## BW

The **BW series** is the fourth series of the Pokémon anime, following after the *Diamond & Pearl* series, and based on the events of the Generation V games.

As with both the *Advanced Generation* and *Diamond and Pearl* series before it, the *BW* series begins with only Ash Ketchum, headed off to a new region with his Pikachu. Much like before, his previous female companion, Dawn, has left the series. Instead, Ash now travels through Unova with a girl by the name of Iris. Unlike the previous three series, with the exception of the Orange Archipelago saga, Brock does not join him in his journey in Unova. Instead, Ash now travels with one of the first Gym Leaders of Unova, Cilan.

# SUPER MARIO

<sup>TM</sup>

A first in Singapore, Super Mario Adventures featuring the famous Mario Brothers - Mario & Luigi, along with other characters from the world famous gaming platform.

Via a 25 to 30mins show of fun fill song and dance, as well as educational elements to bring forth learning experience to kids at the show.

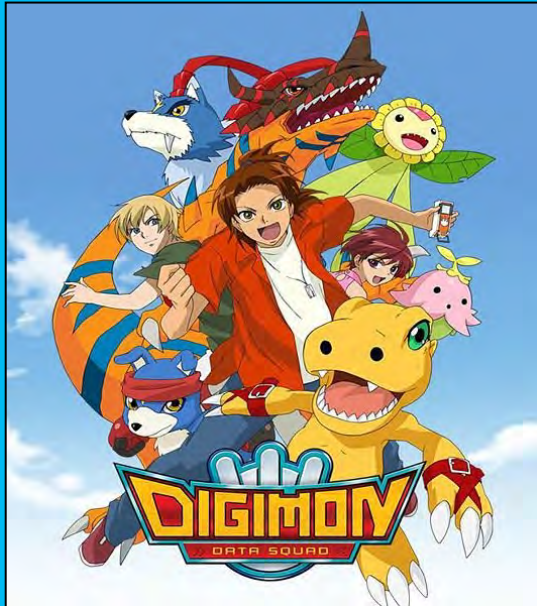

**Dragon Ball Z** follows the adventures of Goku, who along with the Z Warriors, defends the Earth against evil. The action packed adventures are entertaining and reinforces the concept of good versus evil. Dragon Ball Z teaches valuable character virtues such as teamwork, loyalty, and trustworthiness.

The series continues the adventures of Son Goku who, along with his companions, defend the Earth and other fictional planets against various supervillains. While the original *Dragon Ball* anime followed Son Goku through childhood into adulthood, *Dragon Ball Z* parallels his adult life with the maturation of his first child, Son Gohan. The series also gives focus to the evolution of his rivals, Piccolo and Vegeta, from evil to good. The separation between the series is also significant as the later series takes on a more dramatic and serious tone, with a number of villains either threatening or committing acts of mass murder or outright genocide.

The digital world was believed to have been created from data flowing over the internet in our world. That means the digiworld was created sometime in the 1970s or 1980s. For most of the digital world's history time traveled differently than time in our world. One second in our world equaled one day in the digital world. So the digital world has existed for thousands or perhaps even millions of years in its time. Creatures called Digimon inhabit the digital world. Digimon have the ability to evolve into stronger creatures. This ability is called digivolving. Digimon have been digivolving since the beginning. No one knew that digivolving had a serious negative impact on the future. Every time a Digimon digivolved pieces of data were left over. Some Digimon failed to digivolve at all. This left over data and Digimon came together and formed a dark Digimon called Apocalymon. His very existence warped the digital world and created other evil Digimon. Apocalymon's existence is what started the Digimon adventure
